

Euclid Prime is a collection of high-impact, peer-reviewed journals in theoretical and applied mathematics and statistics hosted by **Project Euclid**. The 2017 collection includes current content from 27 titles.

KEY FEATURES

- Hosted on Project Euclid at projecteuclid.org, a joint venture of Duke University Press and Cornell University Library (which hosts the physics and mathematics preprint repository arXiv.org)
- Links from each article to MathSciNet, Zentralblatt MATH, and CrossRef
- Leading journals in Euclid Prime, based on download statistics and faculty requests: *Rocky Mountain Journal of Mathematics*, *Notre Dame Journal of Formal Logic*, *Publicacions Matemàtiques*, *Kodai Mathematical Journal*, and *Tokyo Journal of Mathematics*
- Highly international, with editorial offices across the world, including Japan, Egypt, Senegal, US, Spain, and Belgium
- Full-text searches across the entire collection, cross-searchable with all content on Project Euclid, including open access content
- Interoperability through the Open Archives Initiative
- MathJax display engine for clearly rendered formulas and symbols on all web browsers
- Free access to all back issues for the duration of the deal
- COUNTER 4 and SUSHI-compliant usage statistics
- Full search options, as well as browse by title, publisher, and discipline
- PDF format available for all titles
- Mobile-optimized for use on all devices
- All content archived at the Cornell University Library to ensure long term availability
- Access via IP address and Shibboleth (in Europe)

SUBJECT COVERAGE

Applied mathematics
Logic
Mathematical physics
Statistics
Theoretical mathematics
